

EnergyGuard Coil Cleaner

EnergyGuard Coil Cleaner is a concentrated cleaning agent used for the removal of dirt deposits, oil and grease from exchanger coils and other metal surfaces.

EnergyGuard Coil Cleaner is neutral, non-caustic and very effective for degreasing aluminum and metals that are plated with zinc or copper or stainless steel surfaces.

Applications:

- ✓ **Condensers**
- ✓ **Evaporators**
- ✓ **Air Fin Banks**
- ✓ **Split units**
- ✓ **Other metal surfaces**

Features

In addition to being used to clean coils prior to treatment, **EnergyGuard** Coil Cleaner is also ideally suitable for all degreasing applications, due the environmental friendliness of the basic ingredients.

The application starts with degreasing with the biodegradable agent **EnergyGuard** Coil Cleaner. After degreasing a rinsing of at least 157 oz/ft² (50 ltr/m²) must be executed.

Application

In addition to being used to clean coils prior to treatment, **EnergyGuard** Coil Cleaner is also ideally suitable for all degreasing applications, due the environmental friendliness of the basic ingredients. In the high pressure washer the **EnergyGuard** Coil Cleaner is mixed with water in a ratio of 0-5% **EnergyGuard** Coil Cleaner.

Work process

Pot life

The pot life of **EnergyGuard** Coil Cleaner at 68 °F (20 °C) is 12 months, but the barrel should be closed due to fouling risks, which highly influences the reaction capacity of the substrate.

Storage conditions

If stored in the original closed containers in a cool dry place the shelf life is 12 months.

Method of application

In the high pressure washer the **EnergyGuard** Coil Cleaner is mixed with water in a ratio of 0-5% **EnergyGuard** Coil Cleaner. See **EnergyGuard** Operational Manual (E.O.M.).

Environment & Health

Labeling In accordance with EU directions 67/548/EEG and in accordance with directives on hazardous materials.

For more information, see our MSDS. Do not eat, drink or smoke during application.
